

Wamda Faisal Elmobarak is a graduate research assistant at Qatar University, she is a PhD candidate in chemical engineering, her specialization is in the areas of polymers, nanoparticles, produced water treatment, emulsions separation. Before joining QU, Wamda was working as chemical engineer in central petroleum lab, Sudan for two years (2013–2015), and for one year as teaching assistant at Elneelain university, Sudan (2014). she has over three years of working experience. Wamda received poster presentation Award in 2019. Wamda current research interests include enhanced oil recovery, synthesis of polymers and nanoparticles, produced water treatment.
